1	All counsel will be noted	1	Q. Okay. So I think I
2	on the stenographic record.	2	understand your undergraduate degree is
3	The court reporter is	3	from Purdue University; is that right?
4	Michelle Ridgway, also with	4	A. No, that is not correct.
5	Lexitas.	5	My undergraduate degree is
6	And would you please swear	6	from University of Zagreb.
7	in the witness.	7	Q. Okay.
8	(Witness sworn.)	8	A. Z-A-G-R-E-B. Currently,
9	·	9	the capital of Croatia. But it was
10	GORANKA BJEDOV, Ph.D.,	10	obtained during the time of Yugoslavia.
11	having been first duly sworn,	11	Q. Okay. And that was a
12	was examined and testified as	12	Bachelor of Science?
13	follows:	13	A. By American standard, it
14	IOIIOWS.	14	would be actually considered Bachelor's
15	EXAMINATION	15	of Engineering.
	EXAMINATION		
16		16	Q. Okay.
17	BY MS. RHEE:	17	A. But when it was translated,
18	Q. Good morning.	18	I didn't know, so it was translated as
19	A. Good morning.	19	Bachelor's of Science. It was a
20	Q. I want to start off by	20	five-year degree, basically.
21	asking whether or not you've ever been	21	Q. In engineering?
22	deposed before.	22	A. In engineering and with
	Page 11		Page 13
1	A. Never.	1	thesis. Yes.
2	Q. Okay.	2	Q. Okay. And it was civil
3	A. Sorry.	3	engineering; is that right?
4	Q. Lucky you.	4	A. That is correct. It was
5	A. Yeah. Depends on how you	5	civil engineering, yes.
6	look at it, but	6	Q. For those of us who do not
7	Q. Okay. Given that, just	7	have an engineering background
8	want to go over some basic ground rules.	8	A. Mm-hmm.
9	I'm sure they've already been covered,	9	Q how would you describe
10	but just on the record	10	what civil engineering is?
11	A. Of course.	11	A. So civil engineering is an
12	Q I will be asking you	12	oldest area of engineering, and it
1		1	oracor area or engineering, and re
13		13	concerns itself with things like you
13	questions.	13	concerns itself with things like you have several different subfields so I'm
14	questions. A. Mm-hmm.	14	have several different subfields, so I'm
14 15	questions. A. Mm-hmm. Q. I need you to wait for me	14 15	have several different subfields, so I'm going to go through those.
14 15 16	questions. A. Mm-hmm. Q. I need you to wait for me to finish asking the question, and then	14 15 16	have several different subfields, so I'm going to go through those. For example, you have
14 15 16 17	questions. A. Mm-hmm. Q. I need you to wait for me to finish asking the question, and then I will wait for you to answer, then back	14 15 16 17	have several different subfields, so I'm going to go through those. For example, you have probably the oldest one is the what
14 15 16 17 18	questions. A. Mm-hmm. Q. I need you to wait for me to finish asking the question, and then I will wait for you to answer, then back and forth. Okay?	14 15 16 17 18	have several different subfields, so I'm going to go through those. For example, you have probably the oldest one is the what we call the static subfield, and that
14 15 16 17 18 19	questions. A. Mm-hmm. Q. I need you to wait for me to finish asking the question, and then I will wait for you to answer, then back and forth. Okay? A. Makes sense. Yes.	14 15 16 17 18	have several different subfields, so I'm going to go through those. For example, you have probably the oldest one is the what we call the static subfield, and that one concerns itself with building
14 15 16 17 18 19 20	questions. A. Mm-hmm. Q. I need you to wait for me to finish asking the question, and then I will wait for you to answer, then back and forth. Okay? A. Makes sense. Yes. Q. Okay. Let me begin by just	14 15 16 17 18 19 20	have several different subfields, so I'm going to go through those. For example, you have probably the oldest one is the what we call the static subfield, and that one concerns itself with building structures, like buildings. To a lesser
14 15 16 17 18 19 20 21	questions. A. Mm-hmm. Q. I need you to wait for me to finish asking the question, and then I will wait for you to answer, then back and forth. Okay? A. Makes sense. Yes. Q. Okay. Let me begin by just asking about your background. Okay?	14 15 16 17 18 19 20 21	have several different subfields, so I'm going to go through those. For example, you have probably the oldest one is the what we call the static subfield, and that one concerns itself with building structures, like buildings. To a lesser extent, bridges. But you're talking
14 15 16 17 18 19 20	questions. A. Mm-hmm. Q. I need you to wait for me to finish asking the question, and then I will wait for you to answer, then back and forth. Okay? A. Makes sense. Yes. Q. Okay. Let me begin by just	14 15 16 17 18 19 20	have several different subfields, so I'm going to go through those. For example, you have probably the oldest one is the what we call the static subfield, and that one concerns itself with building structures, like buildings. To a lesser

	Page 14		Page 16
1	You have fluid mechanics,	1	Q. Okay. That's super
2	which happens to be my subfield of	2	helpful.
3	specialization. And that one really	3	And after you received your
4	concerns itself with everything related	4	undergraduate degree in Croatia, it
5	to not just, you know, water and sun,	5	looks like you came to the United
6	but also things like air, you know,	6	States; is that right?
7	basically fluid motion, fluid movement,	7	A. That is correct. I came to
8	and is highly computational field.	8	the United States.
9	Then you have the third	9	Q. Okay. And you got a
10	field that is depending on where you	10	Master's of Science in civil engineering
11	how you call it, but let's let's	11	from Clarkson University?
12	call it traffic engineering. These are	12	A. That is correct.
13	the people that focus on roads,	13	Q. Okay. And, again, was your
14	airports.	14	subspecialty at that time fluid
15	In my system, in my world,	15	mechanics
16	traffic engineering did not involve	16	A. Computational fluid
17	things like, you know, traffic lights	17	mechanics, yes. Correct.
18	and directing the traffic but just	18	Q. Okay. Okay. And then you
19	really building things that are related	19	stayed at Clarkson, it looks like, and
20	to that.	20	you got a Ph.D. in engineering science;
21	Then you have, for example,	21	is that right?
22	geotechnical engineering, which is also	22	A. That is correct. Yes.
	Page 15		Page 17
1	highly computational, and that one is	_	
		1	Q. Okay. And, again, was the
2		1 2	~ 1 , 5 ,
2 3	involved with all aspects of all of our structures, everything that we built		Q. Okay. And, again, was the specialty of fluid engineering? A. It was computational fluid
	involved with all aspects of all of our	2	specialty of fluid engineering?
3	involved with all aspects of all of our structures, everything that we built stands on the ground.	2 3	specialty of fluid engineering? A. It was computational fluid
3 4	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly	2 3 4	specialty of fluid engineering? A. It was computational fluid mechanics. Yes.
3 4 5	involved with all aspects of all of our structures, everything that we built stands on the ground.	2 3 4 5	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that
3 4 5 6	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and	2 3 4 5 6	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got
3 4 5 6 7	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so	2 3 4 5 6	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right?
3 4 5 6 7 8	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is	2 3 4 5 6 7 8	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes.
3 4 5 6 7 8	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing	2 3 4 5 6 7 8	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point,
3 4 5 6 7 8 9	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your	2 3 4 5 6 7 8 9	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer
3 4 5 6 7 8 9 10	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can	2 3 4 5 6 7 8 9 10	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science?
3 4 5 6 7 8 9 10 11	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation	2 3 4 5 6 7 8 9 10 11	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is
3 4 5 6 7 8 9 10 11 12 13	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation and things like that.	2 3 4 5 6 7 8 9 10 11 12	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is incorrect.
3 4 5 6 7 8 9 10 11 12 13 14	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation and things like that. They also have a	2 3 4 5 6 7 8 9 10 11 12 13 14	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is incorrect. Q. Okay.
3 4 5 6 7 8 9 10 11 12 13 14 15	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation and things like that. They also have a subspecialty, especially in California,	2 3 4 5 6 7 8 9 10 11 12 13 14	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is incorrect. Q. Okay. A. You started with my
3 4 5 6 7 8 9 10 11 12 13 14 15 16	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation and things like that. They also have a subspecialty, especially in California, earthquake engineering. So earthquake	2 3 4 5 6 7 8 9 10 11 12 13 14 15	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is incorrect. Q. Okay. A. You started with my undergraduate degree.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation and things like that. They also have a subspecialty, especially in California, earthquake engineering. So earthquake engineering would be a subfield of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is incorrect. Q. Okay. A. You started with my undergraduate degree. Q. Yeah.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation and things like that. They also have a subspecialty, especially in California, earthquake engineering. So earthquake engineering would be a subfield of geotechnical engineering, and so those	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is incorrect. Q. Okay. A. You started with my undergraduate degree. Q. Yeah. A. Prior to my undergraduate
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation and things like that. They also have a subspecialty, especially in California, earthquake engineering. So earthquake engineering would be a subfield of geotechnical engineering, and so those two fields obviously also highly	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is incorrect. Q. Okay. A. You started with my undergraduate degree. Q. Yeah. A. Prior to my undergraduate degree, my undergraduate sorry my
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	involved with all aspects of all of our structures, everything that we built stands on the ground. And the ground is a fairly complex mix of many particulate and nonparticulate soils. And so geotechnical engineering, their job is to tell you what you're really standing on, what can you expect of your substrate to give you so that you can then build the appropriate foundation and things like that. They also have a subspecialty, especially in California, earthquake engineering. So earthquake engineering would be a subfield of geotechnical engineering, and so those two fields obviously also highly computational.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	specialty of fluid engineering? A. It was computational fluid mechanics. Yes. Q. Okay. And then after that it looks like you went to Purdue and got a Master's of Science; is that right? A. That is also correct. Yes. Q. Okay. And at that point, that's when you studied computer science? A. No. That that is incorrect. Q. Okay. A. You started with my undergraduate degree. Q. Yeah. A. Prior to my undergraduate degree, my undergraduate sorry my high school education was in computer

1	And so I started	1	degrees, other than the ones we covered?
2	programming when I was 13. I went to	2	A. No, I do not have any
3	the high school for informatics. By the	3	degrees, additional.
4	time I was 18, I was a little bit burnt	4	Q. Okay. Okay. And then your
5	out of coding, and so I decided to study	5	teaching experience, I take it, was when
6	a different field of engineering.	6	you were at Purdue; is that right?
7	And but throughout all	7	A. I have teaching experience
8	of my studies, you really can't get a	8	at Purdue, but I've actually been
9	master's these days, or even a Ph.D.,	9	instructor in the last two years of my
10	without coding. And so I'm continuing	10	Ph.D. at Clarkson.
11	to code and program.	11	So as an instructor you
12	But during this time, also,	12	also teach classes, and so I I've
13	the whole space develops tremendously.	13	done that at Clarkson as well. So I
14	You start getting new programming	14	have two years of teaching experience
15	languages and so on.	15	there and then seven years of teaching
16	And so by the time that I	16	experience at Purdue.
17	get a job at Purdue as a faculty	17	Q. Okay. So let me just put
18	teaching program to engineering	18	some dates to that.
19	students, I have decided to basically	19	A. Sure.
20	take a formal look at the field that	20	Q. Your teaching experience at
21	I've been in for a long time and, you	21	Clarkson was in the last two years of
22	know, bring my knowledge to the level	22	your Ph.D.?
	Page 19		Page 21
1	that I felt it should be. And so that's	1	A. That is correct.
2	when I get my master's in computer	2	Q. Okay. So that's 1990 to
3	science.	3	1992?
4	You will note that that	4	A. No. It is 1989 to 1991.
5	master's was not thesis master's. I was	5	Q. Okay. Thank you.
6	mostly interested in coursework.	6	And then your seven years
7	Q. Okay. That's very helpful.	7	of experience at Purdue, what are those
8	And that is the sum total	8	years?
9	of your educational background; is that	9	A. Those are 1991 to 1998.
10	right?	10	Q. Okay. And what was your
11	MR. TESLICKO: Object to	11	title when you were teaching at Purdue?
12	form.	12	A. I was at Purdue I was
13	THE WITNESS: So, no, not	13	for most of the time, I was assistant
14	really.	14	professor. But for the last year, I was
15	When you are faculty, you	15	associate professor. I don't remember
16	receive a lot of additional	16	the exact time on when I was promoted to
17	training. I'm not sure how much	17	associate, when I got tenure. But I
18	detail you want to go into.	18	probably '97 '97, most likely.
19	BY MS. RHEE:	19	Q. Okay. And this was in the
20	Q. Yeah. Let me let me	20	School of Civil Engineering?
21	rephrase the question, then.	21	A. No. This was in the
22	Do you have any other	22	department well, actually, yes, it

1	A. No, I was not a	manager at 1	substance of any communications
2	Facebook.	2	with counsel.
3	Q. All right. You	were an 3	THE WITNESS: Yeah. So,
4	individual contributor?	4	basically, I was contacted by
5	A. That is correct.	Yes. 5	the plaintiffs, and we discussed
6	Q. Okay. And so you	u are only 6	things, and I decided to accept
7	talking about seniority levels	na n-assurance services	their request to help them put
8	individual contributors?	8	together my my report.
9	A. Very correct. For	or 9	BY MS. RHEE:
10	engineers.	10	Q. Okay. And when was that?
11	Q. Okay. Well, but	there are 11	A. First contact was about two
12	lots of engineers who are mana		years ago. Yes, two years ago. Summer
13	well, correct?	13	2023. But then nothing really happened
14	A. There are a lot	of 14	until I think we finished all the
15	engineers who make the transi	tion to the 15	paperwork in, like, January of 2024.
16	management track, yes.	16	Don't hold me on the but, roughly,
17	Q. Okay. Okay. So	your 17	that timeframe.
18	testimony about being	18	Q. Okay. Okay. At the time
	122	19	that Plaintiffs contacted you, you had
20	A. Mm-hmm.	20	not done any expert work before; is that
21	Q for engineers	are about 21	right?
22	individually contributing eng	ineers? 22	A. That is correct. Yes.

1	time. I was, actually, after my trip,	1	this is 2012, 2013. So I can tell you
2	with my mom. That's why I remember the	2	that Mr. Eric Cantor was the Speaker of
3	timing.	3	the House at the time.
4	And and so I responded	4	Q. Okay.
5	to that particular e-mail, and, you	5	A. I whatever. He was
6	know, obviously this is your world. And	6	Republican lead at the time.
7	for maybe for all of you, this would be	7	Q. Okay.
8	like, well, you know, it's just DOJ.	8	A. So he was he was it
9	For me it's like, oh, my God, what did I	9	was during his tenure.
10	do now.	10	Q. Okay.
11	And and so we set up the	11	A. And they were the
12	time to talk on the phone, time	12	Republican caucus. And I apologize,
13	differences being what they are.	13	because all of these terms are very much
14	We ended up talking, and,	14	outside of my normal vocabulary, so if I
15	obviously, that communication, my	15	misuse some of them, I'm sorry.
16	understanding is it's protected. And	16	They were having a hearing
17	so	17	on, you know, status of women in
18	Q. I got it. Okay.	18	technology and and in those fields.
19	A. Mm-hmm.	19	And in particular, I received a request
20	Q. Have you been retained in	20	from Facebook's office in Washington
21	any other case to provide expert work?	21	that I be present. That was very
22	A. No.	22	unusual. And the explanation was that

1	list of candidates in this	1	A. I do know the answer to
2	field. Like no.	2	that question.
3	BY MS. RHEE:	3	Q. Okay.
4	Q. Okay.	4	A. So I have so far I have
5	A. This is completely outside	5	charged about \$150,000
6	of my area of expertise.	6	Q. Okay.
7	Q. Okay. So also safe to say	7	A total.
8	you've never written an expert report	8	I have been paid out
9	before?	9	\$80,000. So \$80,000. That's 200 hours.
10	A. That is very correct. Yes.	10	Yeah. So a couple hundred hours. Like
11	Q. Okay. How many people from	11	500 hours or so.
12	Keystone Strategy were assigned to help	12	Q. Okay. Yeah. Sorry. I
13	you?	13	can't do math, hence I took out my phone
14	A. I actually don't know the	14	to pull out the calculator.
15	answer to that question.	15	A. No, no. That's fine.
16	Q. How do you not know?	16	But I do remember as I
17	A. I can only tell you,	17	said, I do remember the exact numbers
18	roughly, how many people I interacted	18	for how much I have billed for and how
19	with.	19	much I have been received payment
20	Q. Okay.	20	for, but I haven't billed for all of the
21	A. But were there people doing	21	hours yet.
22	work that, you know, I am unaware of? I	22	Q. Okay. So sitting here
	Page 55		Page 57
1	don't know. So I don't I honestly	1	today, your best approximation is about
2	don't know the answer to your question.	2	500 hours; is that what I'm hearing?
3	I personally interacted	3	MR. TESLICKO: Object to

1	way I can	1	A. I think I've had access to
2	Q. Well, did you get a	2	some of the stuff before 2025.
3	mountain?	3	Q. Okay.
4	A. Oh, yeah. I had access to	4	A. But definitely not all of
5	everything that was produced in the	5	the stuff.
6	case.	6	Q. Okay.
7	Q. Okay.	7	A. But there was just a lot of
8	A. And so now I you know, I	8	documents.
9	see all of these documents, and I see	9	Q. Okay. And can I ask
10	the timelines. And I'm going, like, all	10	because what we have, as I'm sure you
11	right.	11	know
12	Q. When you say "timelines,"	12	A. Mm-hmm.
13	what do you mean? What are you	13	Q because they are your
14	referring to?	14	reports, the Appendix A for each one of
15	A. Oh, I'm talking about when	15	your reports
16	my report needs to be written and then	16	A. Mm-hmm.
17	when the rebuttal report needs to be	17	Q lists the materials that
18	written	18	you relied upon for that report, right?
19	Q. I see.	19	A. It lists a subset of
20	A and then the reply	20	materials that in particular,
21	report.	21	materials that I referred to and quoted
22	From my perspective, this	22	in the report.
	Page 59		Page 61
1	· ·	1	
2	is all moving fairly quickly. But, again, I'm giving you a judgment on	2	I've certainly reviewed a lot more things that I don't necessarily
3	something that I really have no basis	3	quote because I find them not relevant
4	for comparison. So you may disagree and	4	to the matter that I'm discussing.
5	you may reasonably say no, no, no, this	5	Q. Okay. So I want to make
6	is a very slow one.	6	sure I understand.
7	For me, personally, I felt	7	What you put in those
8	that things were moving quickly.	8	appendices to your report
9	Q. Okay. So when did you	9	A. Mm-hmm.
10	first get access to, as you put it, the	10	Q is only what you cited?
11	mountain of documents in connection with	11	A. That is correct. Yes.
12	when you thought your first report was	12	Q. But that is not let me
13	due?	13	make sure I break this down.
14	A. I really don't remember. I	14	It is not everything that
15	honestly don't remember. This was a	15	you reviewed?
16	long time ago. I would really hate to	16	A. That is correct. Yes.
17	make a guess here. I don't remember.	17	Q. Okay. And I take it, it is
18	I'm sorry.	18	not everything you relied upon
19	Q. Okay. Well	19	MR. TESLICKO: Object to
20	A. A long time ago.	20	form.
21	Q what do you mean by "a	21	BY MS. RHEE:
22	long time ago"? In 2025?	22	Q if you didn't actually

1	cite it?	1	Does that sound roughly
2	MR. TESLICKO: Object to	2	right to you?
3	form.	3	A. Oh, I remember there was
4	THE WITNESS: No. If I am	4	about 20, 21 in the first report, so the
5	using a document to form my	5	numbers, order of magnitude, certainly
6	opinion or if I'm using a	6	makes sense, yes.
7	document to let's put it this	7	Q. Okay.
8	way to say, well and here	8	A. And then there is a whole
9	is a document that confirms my	9	lot of other documents that I cite
10	opinion, then I'm going to cite	10	Q. I totally understand, but I
11	it.	11	just want to focus on the
12	BY MS. RHEE:	12	Google-produced documents for now.
13	Q. Okay.	13	A. All right.
14	A. But if I'm just reading a	14	Q. Okay. You're right. You
15	document for example, I've read	15	cite or you list 20-some-odd Google
16	transcripts of depositions, of number	16	documents in your opening report.
17	of them. And I apologize. I'm really	17	A. Mm-hmm.
18	terrible with names.	18	Q. And then in total it's
19	Q. Okay.	19	about 30. Sound about right?
20	A. But I've read the	20	A. Sounds fair. Yes.
21	transcripts from several Google	21	Q. Okay. And based on your
22	witnesses in the case. I've read them	22	answer just now, that is the universe of
	Page 63		Page 6
1	for several reasons. Because I wanted	1	Google-produced documents, out of the
2	to see what this process looks like, but	2	mountain of documents that you had
3	also I wanted to understand, you know,	3	access to, that you either cited in you
4	what are they saying, what are they	4	reports or otherwise relied upon; is
5	claiming. Are they saying things that I	5	that right?
6	will strongly disagree with and say,	6	MR. TESLICKO: Object to
7	well, no, that's just wrong, and I can	7	form.
8	prove it is wrong.	8	THE WITNESS: So there are
9	Or are they saying things	9	other Google documents that I
10	that you can look at and go, like, well,	10	have read and thought, oh,
11	I disagree with them, but, objectively,	11	they
12	it's quibbling.		
13	And so I read a lot of	13	that I didn't cite because,
14	those depositions. I don't cite them in	14	honestly, the form that they
15	my report. They were completely	15	were written in, I totally
16	irrelevant to it.	16	understand. They were
17	Q. Okay. I think I	17	engineers.
18	understand.	18	But I didn't think that in
19	You cite, I think, 30 I	19	the legal sense it would be very
20	think the count is something around 32	20	helpful to either you or the
20	unique Google documents across your	21	judge to see
22	three reports.		Judge to bee

1	different parts of Plaintiffs'	1	APIs, they actually need to connect to
2	proposed remedies.	2	something, right?
3	BY MS. RHEE:	3	MR. TESLICKO: Object to
4	Q. Yes. Okay. So let's just	4	form.
5	quickly go through those. Right?	5	THE WITNESS: So in order
6	A. Mm-hmm.	6	for API to be useful, you
7	Q. DOJ's proposed remedies for	7	typically are connecting to a
8	what they refer to as DFP	8	system.
9	A. Mm-hmm.	9	BY MS. RHEE:
10	Q goes in three phases,	10	Q. Mm-hmm.
11	right?	11	A. And it's the system that
12	A. That is correct.	12	exposes its API.
13	Q. Okay. And the first phase,	13	So you have exchanges, and
14	which is a form of integration, right?	14	inside those exchanges, there is a
15	The first phase is a Prebid integration,	15	bidding process going on. Those
16	right?	16	exchanges have APIs.
17	MR. TESLICKO: Object to	17	And what we're saying is,
18	form.	18	Google needs to provide APIs that would
19	THE WITNESS: Excuse me?	19	level the playing field for the
20	You say form of integration?	20	bidding during the bidding process.
21	Could you tell me what you mean	21	Q. Mm-hmm. Okay.
22	by that.	22	And what is the timeframe
	Page 75	5	Page 77
1	BY MS. RHEE:	1	that you estimate in order for those
			APIs to be created and confirmed to work
2	Q. Well, actually, maybe I	2	APIS to be created and continued to work
3	Q. Well, actually, maybe I should ask you.	3	as intended?
3	should ask you.	3	as intended?
3 4	should ask you. What is the first phase	3 4	as intended? MR. TESLICKO: Object to
3 4 5	should ask you. What is the first phase that you opine upon?	3 4 5	as intended? $\label{eq:mr.} \mbox{MR. TESLICKO: Object to} \\ \mbox{form.}$
3 4 5 6	should ask you. What is the first phase that you opine upon? A. So the first phase of DFP	3 4 5 6	as intended? MR. TESLICKO: Object to form. THE WITNESS: So I specify
3 4 5 6 7	should ask you. What is the first phase that you opine upon? A. So the first phase of DFP divestiture and you can see in my	3 4 5 6 7	as intended? MR. TESLICKO: Object to form. THE WITNESS: So I specify that in my report.
3 4 5 6 7 8	should ask you. What is the first phase that you opine upon? A. So the first phase of DFP divestiture and you can see in my report is creation of the APIs.	3 4 5 6 7 8	as intended? MR. TESLICKO: Object to form. THE WITNESS: So I specify that in my report. And I is it okay if I
3 4 5 6 7 8	should ask you. What is the first phase that you opine upon? A. So the first phase of DFP divestiture and you can see in my report is creation of the APIs. Those	3 4 5 6 7 8	as intended? 	Page 78		Page 80
1	the question. I do want to give	1	understanding of what Phase 3 entails?
2	you a caveat that there are many	2	A. So my understanding of
3	different parts, moving parts,	3	Phase 3 is that it involves what I would
4	in this particular case, and so,	4	call cutting out and moving DFP and
5	to the best of my recollection,	5	making it available for purchase to one
6	which could be off in this case,	6	or more buyers. Obviously, the DFP
7	if I remember correctly, it was	7	product that remains after Phase 1 and
8	18 months.	8	Phase 2 have been completed.
9	It could go as high as 24,	9	Q. Okay. And what is your
10	but I think 18 months is a	10	opinion about how long that is going to
11	reasonable amount of time for	11	take?
12	creation of APIs.	12	A. So, again, I would like to
13	BY MS. RHEE:	13	refer you to my report.
14	Q. Okay. And then you opine	14	I estimate that DFP
15	about the next step in DOJ's proposal to	15	divestiture is going to take a little
16	divest DFP, right?	16	bit longer than the other two things,
17	A. Mm-hmm. That is correct.	17	and there are specific reasons for it.
18	Q. Okay. And what is your	18	And I think my estimate is
19	understanding of what that Phase 2 is?	19	that DFP by itself should be
20	A. So as per Plaintiffs'	20	somewhere let's call it in 24 to
21	proposed remedies, Phase 2 is	21	30 months.
22	open-sourcing of the final auction logic	22	Q. Okay. And then, finally,
			D 04
	Page 79		Page 81
1	and making it available in an	1	DOJ has a proposal to divest what it
2	and making it available in an open-source context.	2	DOJ has a proposal to divest what it refers to as the Ad Exchange, or AdX,
2 3	and making it available in an open-source context. Q. Okay. And what is your	2	DOJ has a proposal to divest what it refers to as the Ad Exchange, or AdX, right?
2 3 4	and making it available in an open-source context. Q. Okay. And what is your opinion about how long that's going to	2 3 4	DOJ has a proposal to divest what it refers to as the Ad Exchange, or AdX, right? A. That is correct.
2 3 4 5	and making it available in an open-source context. Q. Okay. And what is your opinion about how long that's going to take?	2 3 4 5	DOJ has a proposal to divest what it refers to as the Ad Exchange, or AdX, right? A. That is correct. Q. Okay. And you have an
2 3 4 5 6	and making it available in an open-source context. Q. Okay. And what is your opinion about how long that's going to take? A. Again, that has been	2 3 4 5	DOJ has a proposal to divest what it refers to as the Ad Exchange, or AdX, right? A. That is correct. Q. Okay. And you have an opinion about how long that would take?
2 3 4 5 6 7	and making it available in an open-source context. Q. Okay. And what is your opinion about how long that's going to take? A. Again, that has been defined in my in my report, so I'm	2 3 4 5 6	DOJ has a proposal to divest what it refers to as the Ad Exchange, or AdX, right? A. That is correct. Q. Okay. 2 3 4 5 6 7 8 9 10	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a	2 3 4 5 6 7 8 9 10	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be
2 3 4 5 6 7 8 9 10 11 12	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no.	2 3 4 5 6 7 8 9 10 11	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular
2 3 4 5 6 7 8 9 10 11 12 13	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no. BY MS. RHEE:	2 3 4 5 6 7 8 9 10 11 12	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular code base or subdirectory. And those
2 3 4 5 6 7 8 9 10 11 12 13 14	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no. BY MS. RHEE: Q. Okay.	2 3 4 5 6 7 8 9 10 11 12 13 14	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular code base or subdirectory. And those are clearly identified.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no. BY MS. RHEE: Q. Okay. A. You know, the answer to	2 3 4 5 6 7 8 9 10 11 12 13 14	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular code base or subdirectory. And those are clearly identified. So Google is pretty strict
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no. BY MS. RHEE: Q. Okay. A. You know, the answer to that is, it depends.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular code base or subdirectory. And those are clearly identified. So Google is pretty strict about how they maintain their code base,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no. BY MS. RHEE: Q. Okay. A. You know, the answer to that is, it depends. Q. What does it depend on?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular code base or subdirectory. And those are clearly identified. So Google is pretty strict about how they maintain their code base, and, in my opinion, rightfully so.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no. BY MS. RHEE: Q. Okay. A. You know, the answer to that is, it depends. Q. What does it depend on? A. It depends on how the code	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular code base or subdirectory. And those are clearly identified. So Google is pretty strict about how they maintain their code base, and, in my opinion, rightfully so. And so I've, you know, made
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no. BY MS. RHEE: Q. Okay. A. You know, the answer to that is, it depends. Q. What does it depend on? A. It depends on how the code is organized.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular code base or subdirectory. And those are clearly identified. So Google is pretty strict about how they maintain their code base, and, in my opinion, rightfully so. And so I've, you know, made my estimates with the understanding that
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	The process that I'm describing is agnostic to what the code base does. BY MS. RHEE: Q. I take it from your answer, your opinion is also agnostic as to how many items within that code base either need or do not need to be open-sourced? MR. TESLICKO: Object to form. THE WITNESS: Yes, and a no. BY MS. RHEE: Q. Okay. A. You know, the answer to that is, it depends. Q. What does it depend on? A. It depends on how the code is organized. So to give you a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	case and I can't recall off the top of my head which ones they actually describe the process it goes through. Code reviews. It has to be reviewed by the at least one other person. But, for example, if I'm trying to do the code check-in into code base that doesn't even belong to my team, then it's going to be reviewed by one other person, and it's going to be reviewed by the owner of that particular code base or subdirectory. And those are clearly identified. So Google is pretty strict about how they maintain their code base, and, in my opinion, rightfully so. And so I've, you know, made my estimates with the understanding that that is the code base that I'm dealing

1	have to completely take it apart and	1	MR. TESLICKO: Object to
2	spend three months figuring out, you	2	form.
3	know, why is this thing directly looking	3	THE WITNESS: That is
4	and pulling something from a memory, you	4	actually incorrect.
5	know, at a particular location, because	5	Well, I I worked on
6	that is just not allowed at Google. You	6	both AdSense and I had an intern
7	don't you know, you don't do that.	7	actually do some work for
8	Q. Okay. For your assignment	8	AdWords. And you could argue,
9	in this case	9	you know, DFP gets integrated
10	A. Mm-hmm.	10	fully after I leave Google. So
11	Q you did not look at the	11	not exactly this code base.
12	actual source code with respect to any	12	However, it is a code base
13	of these products, right?	13	inside Google3. And while I was
14	A. That is correct. Yes.	14	at Google, we completed
15	Q. It was just not part of	15	integration from Google2 to
16	your assignment?	16	Google3.
17	A. That is not part of my	17	And so I'm familiar with
18	assignment. That is correct.	18	the rules, in particular for C++
19	Q. Okay. So insofar as you	19	code base.
20	talk about your assumptions	20	BY MS. RHEE:
21	A. Mm-hmm.	21	Q. I just want to understand,
22	Q about what the source	22	though.
	Page 115		Page 117
1	code looks like, that is either based on	1	A. Mm-hmm.
2	your work at Google from 2005 to 2010 or	2	Q. What you're talking about
3	from Professor Weissman; is that right?	3	in terms of your familiarity is from
4	MR. TESLICKO: Object to	4	your time at Google, right?
5	form.	5	A. My personal familiarity,
6	THE WITNESS: I do rely on	6	yes, it's from my time at Google.
7	my expertise, but it has been	7	Q. Okay. And that was
8	informed by Professor Weissman's	8	15 years ago?
9	opinions.	9	A. That was, yes. End of my
10	BY MS. RHEE:	10	time there was 15 years ago.
11	Q. I see. Okay.	11	Q. Okay. So going to this
12	But with respect to Google	12	page ending in 501.
13	source code, specifically	13	
14	A. Mm-hmm.		
15	Q you stopped working at		
16	Google some time ago?		
17	A. Fifteen years ago, roughly.		
18	Yeah.		
19	Q. Okay. And even when you		
20	were working at Google, you did not have		
21	any reason or occasion to look at the		
1 2 2	course gode of those products right?		
22	source code of these products, right?

1	said.	1	So there is nothing in his
2	You did rely on	2	deposition that changed my opinion, that
3	Mr. Levitte's testimony about GCP but	3	made me question or do additional
4	not about DFP?	4	research. It was just, like, all right.
5	A. No, not really. So	5	You know, put aside and move on.
6	Q. Well, I just want to make	6	Q. So your answer just now
7	sure, because	7	talked about a standard you applied in
8	A. Mm-hmm.	8	deciding whether or not you would add a
9	Q just reading back your	9	source to your appendix, and you said,
10	answer, "I relied a lot on what he was	10	oh, well, is it material?
11	telling me about GCP, that he was	11	Have I got that right?
12	confirming, basically, what I would	12	MR. TESLICKO: Object to
13	expect about GCP."	13	form.
14	A. So I misspoke.	14	THE WITNESS: As long as
15	Q. I just want	15	you don't use "material" in some
16	A. That is absolutely fair.	16	legal way that I don't know what
17	You're absolutely fairly calling me out.	17	it means.
18	I misspoke. I relied.	18	BY MS. RHEE:
19	I read his report and tried	19	Q. I just really want to
20	to sort of verify. I have public	20	understand what's the standard
21	sources of information that tell me how	21	A. What it means to me
22	GCP functions.	22	Q what's the standard you

So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently.
2 3 4 5 6 7 8 9	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he	2 3 4 5 6 7 8 9	A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to
2 3 4 5 6 7 8 9 10	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely	2 3 4 5 6 7 8 9 10	apply? A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow
2 3 4 5 6 7 8 9 10 11	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely different than the public documentation,	2 3 4 5 6 7 8 9 10 11	apply? A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow themselves to be anchored.
2 3 4 5 6 7 8 9 10 11 12	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely different than the public documentation, my expectation, and so on, well, then	2 3 4 5 6 7 8 9 10 11 12	A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow themselves to be anchored. So, for example, before I
2 3 4 5 6 7 8 9 10 11 12 13	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely different than the public documentation, my expectation, and so on, well, then that's material.	2 3 4 5 6 7 8 9 10 11 12 13	apply? A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow themselves to be anchored. So, for example, before I start analyzing all of this, I don't
2 3 4 5 6 7 8 9 10 11 12 13 14	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely different than the public documentation, my expectation, and so on, well, then that's material. Then I have to say either I	2 3 4 5 6 7 8 9 10 11 12 13 14	apply? A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow themselves to be anchored. So, for example, before I start analyzing all of this, I don't want anybody telling me how long they
2 3 4 5 6 7 8 9 10 11 12 13 14 15	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely different than the public documentation, my expectation, and so on, well, then that's material. Then I have to say either I mistrust his opinion or you know, or,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	apply? A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow themselves to be anchored. So, for example, before I start analyzing all of this, I don't want anybody telling me how long they think this should take, because as much
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely different than the public documentation, my expectation, and so on, well, then that's material. Then I have to say either I mistrust his opinion or you know, or, basically, everything I know is wrong,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow themselves to be anchored. So, for example, before I start analyzing all of this, I don't want anybody telling me how long they think this should take, because as much as I deeply believe it wouldn't impact
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely different than the public documentation, my expectation, and so on, well, then that's material. Then I have to say either I mistrust his opinion or you know, or, basically, everything I know is wrong, and I have to go and dig into it deeper.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow themselves to be anchored. So, for example, before I start analyzing all of this, I don't want anybody telling me how long they think this should take, because as much as I deeply believe it wouldn't impact me, I'm also aware of all of the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	But here, I have a person that actually lives that every day of his life. This is his home. And so I read his opinion to find out if everything I know about this is consistent. Is my understanding of the space that he's describing consistent with all the public information and so on. Or, for example, if he brought up something that was completely different than the public documentation, my expectation, and so on, well, then that's material. Then I have to say either I mistrust his opinion or you know, or, basically, everything I know is wrong, and I have to go and dig into it deeper. But that hasn't happened.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Oh, perfect. So when I do my work, right, I come up at least my personal process and the one that a large number of the industry participants would agree with, but some tend to break is I want to arrive to my judgment independently. People have a tendency to run into problems when they allow themselves to be anchored. So, for example, before I start analyzing all of this, I don't want anybody telling me how long they think this should take, because as much as I deeply believe it wouldn't impact me, I'm also aware of all of the research in human psychology that says

1	And I also deployed the	1	will know, Google will return you
2	standard processes and procedures used	2	millions of documents.
3	in this type of an analysis. Yes.	3	And you now sort through
4	Q. Okay.	4	those documents. Typically, you sort by
5	A. Mm-hmm.	5	the validity, or let's call the
6	Q. And that was the sum total	6	engineering level of trust in the
7	so that you could stay pristine, as you	7	reporting source.
8	put it, of what you actually relied upon	8	So I'm not going to look at
9	in order to come up with your timelines?	9	anything that BuzzFeed puts out. But
10	MR. TESLICKO: Object to	10	if, you know, IP Police putting it out,
11	form.	11	that is important.
12	THE WITNESS: Sorry.	12	Then I will look at, you
13	At that point in time, you	13	know, maybe five or ten different
14	call that first draft, right.	14	documents, and what you find, a lot of
15	BY MS. RHEE:	15	times they overlap on, you know,
16	Q. Okay.	16	90 percent of the material.
17	A. So that is the first step	17	I will quote you two or
18	in the process. You kind of put your	18	three documents, the minimal subset,
19	stake into the ground and say, here is	19	that has all the information I relied
20	what I think this should take.	20	on, packaged in the form that I relied
21	Q. Okay. And so did you put	21	on it.
22	all of those materials into your	22	But I may have seen another

I'm not going to quote them all here because they are, in my opinion, an element to
2 3 4 5 6 7 8 9 10 11	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your	2 3 4 5 6 7 8 9 10 11	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case.
2 3 4 5 6 7 8 9 10 11 12 13	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your first draft, did you put in your	2 3 4 5 6 7 8 9 10 11 12	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case. The parts that I quote are
2 3 4 5 6 7 8 9 10 11 12 13 14	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your first draft, did you put in your appendices?	2 3 4 5 6 7 8 9 10 11 12 13 14	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case. The parts that I quote are the sort of the minimal subset. Like,
2 3 4 5 6 7 8 9 10 11 12 13 14	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your first draft, did you put in your appendices? MR. TESLICKO: Object to	2 3 4 5 6 7 8 9 10 11 12 13 14	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case. The parts that I quote are the sort of the minimal subset. Like, what is the highest-quality minimal
2 3 4 5 6 7 8 9 10 11 12 13 14 15	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your first draft, did you put in your appendices? MR. TESLICKO: Object to form.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case. The parts that I quote are the sort of the minimal subset. Like, what is the highest-quality minimal subset that contains everything I have
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your first draft, did you put in your appendices? MR. TESLICKO: Object to form. THE WITNESS: No. And	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case. The parts that I quote are the sort of the minimal subset. Like, what is the highest-quality minimal subset that contains everything I have relied on.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your first draft, did you put in your appendices? MR. TESLICKO: Object to form. THE WITNESS: No. And allow me to explain.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case. The parts that I quote are the sort of the minimal subset. Like, what is the highest-quality minimal subset that contains everything I have relied on. So everything I relied on
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your first draft, did you put in your appendices? MR. TESLICKO: Object to form. THE WITNESS: No. And allow me to explain. BY MS. RHEE:	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case. The parts that I quote are the sort of the minimal subset. Like, what is the highest-quality minimal subset that contains everything I have relied on. So everything I relied on has to be in there, but it can also be
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	appendices? MR. TESLICKO: Object to form. THE WITNESS: You have the list of all of the publicly available documents, yes? BY MS. RHEE: Q. No. I do. I'm asking is that A. Yes. Q everything you looked up, you looked at, to come up with your first draft, did you put in your appendices? MR. TESLICKO: Object to form. THE WITNESS: No. And allow me to explain. BY MS. RHEE: Q. Okay. Okay.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	five documents that had this bit, or that bit, that is already in these three documents, that I just don't quote. You know, I have read I don't even know how to estimate probably or skimmed, in my whole career, hundreds and thousands of documents related to these things. I'm relying on all of them in some way. I'm not going to quote them all here because they are, in my opinion, an element to the case. The parts that I quote are the sort of the minimal subset. Like, what is the highest-quality minimal subset that contains everything I have relied on. So everything I relied on has to be in there, but it can also be seen in some other documents, because

1	Q. Okay.	1	different known proprietary environment,
2	A. Because, as you see, in our	2	let's search for that, you're not going
3	field people tend to cut and paste,	3	to find any documents with the time
4	copy, and especially today, you have a	4	estimate for that.
5	whole ton of AI-generated documents.	5	That type of work is
6	You know, if you're going	6	typically done by the company that owns
7	to quote all of them, like, that's going	7	the product internally. It is not
8	to be a lot of paper wasted.	8	exactly available online.
9	Q. Okay. Then in the second	9	And so, you know, that kind
10	stage	10	of information I'm hoping I'm going to
11	A. Mm-hmm.	11	find somewhere. But I'm not going to
12	Q of your evaluation	12	search for it online because I know it's
13	A. Mm-hmm.	13	not available online.
14	Q in finalizing your	14	And so in my Stage II, I am
15	opinion is that fair to say?	15	trying to call it the testing stage.
16	A. Yes.	16	I'm trying to test my work and and
17	Q. In finalizing your opinion,	17	look at it as if it's somebody else's
18	that's when you look for material. And	18	work and say, did the person who did
19	I think your testimony was that you may	19	this work, did they do everything that
20	have materially forgotten in your	20	needed to be done? Did they encounter
21	analysis; is that right?	21	everything? Did they do due diligence?
22	MR. TESLICKO: Object to	22	And so this is my testing

1	clearly saw in the way that you	1	THE VIDEOGRAPHER: Off the
2	A. Mm-hmm.	2	record at 11:35.
3	Q answered the question,	3	(Short break.)
4	it seems like it was more than one	4	THE VIDEOGRAPHER: On the
5	document. You clearly saw, as you put	5	record at 11:48.
6	it, some documents where	6	BY MS. RHEE:
7	A. Mm-hmm.	7	Q. During all of these
8	Q	8	breaks
		9	A. Mm-hmm.
		10	Q I never want to actually
11	I am now asking you	11	know what, if anything, was said by
12	A. Mm-hmm.	12	counsel. So I before Mr. Teslicko
13	Q for that number of	13	jumps in and gives his warning like a
14	unknown documents or unknown number	14	broken record, I just want to be very
15	of documents	15	clear, that is not what I'm asking.
		16	A. Mm-hmm. Mm-hmm.
17	Did you put them down, all	17	Q. But just for the record,
18	of them down, in one of your appendices?	18	want to be assured that during all of
19	A. I	19	the breaks, are you talking about the
20	MR. TESLICKO: Object to	20	substance of your answers?
21	form.	21	A. No. We are talking about
22	202	22	hiking.
	Page 159		Page 161
1	put most of them down or I	1	Q. Well, even there, I don't
2	put most of them down.	2	want to know what what, in fact,
3	But I would be hesitant to	3	you're talking about, other than just
4	tell you that I put all of them	4	making sure that the substance of your
5	down.	5	answers on the record are not the topic
6	However, if there is a	6	of discussion.
7	document that I haven't put down	7	A. But before I answer your
8	, I	8	question, it was raised that I have
9	would be very happy to look at	9	confused the two names.
10	it right now and analyze it and	10	I told you, I'm really
11	tell you why.	11	terrible with names. And if you look at
12	You know, I don't think	12	my responses to your questions, I'm
13	there is a document like that.	13	talking constantly about the GCP guy and
14	But if there is, I would be very	14	his response. And I thought that his
15	happy to, you know, look through	15	name was George Levitte.
16	it and tell you why I didn't	16	And apparently that is not
17	rely on it.	17	his name. His name is something else.
18	BY MS. RHEE:	18	Sam?
19	Q. Okay.	19	Q. Okay.
20	MS. RHEE: Is it okay if	20	A. Let's go with Sam.
21	we take another break, because	21	And so when you were asking
1			
22	I've had a lot of water.	22	all of those questions, I was thinking

	1	Q. How was that provided to	1	that's the total? There's nothing else?
	2	you when you didn't look at the source	2	A. I have also reviewed
	3	code yourself?	3	Dr. Weissman's reports themselves, in
	4	A. So it was provided to me	4	particular, portions that discuss what
	5	I had access to Dr. Weissman's draft	5	we have referred to that could be
	6	report before the first round of our	6	relevant to the things that we are
	7	report submittal.	7	talking about, Stage I and Stage II of
	8	So don't quote me on the	8	DFP divestiture, because in those stages
	9	date, but July.	9	the he's discussing the ability to
	10	MR. TESLICKO: Instruct	10	create APIs and the ability to cut out a
	11	you not to discuss drafts	11	code and open-source that portion of the
	12	because they are carved out by	12	code.
	13	the expert stipulation.	13	And I'm relying on his
	14	BY MS. RHEE:	14	expert opinion that the code is it is
	15	Q. Are you going to follow	15	possible to do those things.
	16	counsel's instruction not to answer that	16	Q. Okay. In particular, you
	17	question?	17	seem to spend some time looking at what
	18	A. Yeah.	18	you referred to as Dr. Weissman's source
	19	Q. Okay.	19	code statistics; is that right?
	20	A. I'm sorry. But yeah.	20	A. That is correct.
	21	Q. I had to ask.	21	Q. Okay. And what do you
	22	Okay.	22	understand Dr. Weissman to have done to
		Page 211		Page 213
	1	A. You're doing your job.	1	put together his source code metrics
	2	Q. I just want to make clear,	2	that he sets out in his source code
	3			
	4	since you did not look at the source	3	appendix?
		since you did not look at the source code yourself, did you have access to	3 4	appendix? A. So I have seen some of the
	5	-		
	5 6	code yourself, did you have access to	4	A. So I have seen some of the
		code yourself, did you have access to anything that Dr. Weissman did that is	4 5	A. So I have seen some of the statements that Dr. Weissman lists. He
	6	code yourself, did you have access to anything that Dr. Weissman did that is not set forth in his final reports?	4 5 6	A. So I have seen some of the statements that Dr. Weissman lists. He happens to use SQL to obtain this
	6 7	code yourself, did you have access to anything that Dr. Weissman did that is not set forth in his final reports? A. No. I have not relied on	4 5 6 7	A. So I have seen some of the statements that Dr. Weissman lists. He happens to use SQL to obtain this information.
	6 7 8	code yourself, did you have access to anything that Dr. Weissman did that is not set forth in his final reports? A. No. I have not relied on anything other than that other than	4 5 6 7 8	A. 1	So what specifically did	1	C++ code base has, I don't know,
2	you ask for?	2	tens of thousands of files and
3	MR. TESLICKO: I'm just	3	they are all smaller than 25 to
4	going to instruct you not to	4	30 lines of code. That would
5	disclose the substance of any	5	give me a pause.
6	communications with Keystone or	6	What's going here. Like,
7	with counsel.	7	why would anybody do this. And
8	THE WITNESS: Mm-hmm.	8	I would question what kind of
9	So when I have worked at	9	code base I'm dealing with.
10	Google, I had an insight, and I	10	So these are sort of
11	was, you know, inside Google3,	11	consider them health checks,
12	and I looked at some of the	12	right.
13	stuff.	13	If you were to go to a
14	And so what I'm looking	14	doctor and they do a blood test
15	for over here is, is the code	15	and they look at the number of
16	base still what I would consider	16	parameters, you look at it and
17	clean and healthy code base.	17	say is this person healthy, and
18	And there are a couple of things	18	you basically make a decision
19	that can tell you that.	19	that, yeah, this this is a
20	Not a single line in that	20	healthy person.
21	table by itself necessarily	21	Now, that really does not
22	means much. But, in general,	22	mean, necessarily, that the
	Page 215		Page 21
1	you're looking at and, again,	1	person is not suffering from
2	I make predictions about the	2	something you don't see.
3	code base before I get the	3	But nine times out
4	confirmation.	4	actually, I would say 99 times
5	So I would expect AdX to,	5	out of 100, it gives you a
6	for example, be smaller than all	6	really clear insight in what
7	of the utilities.	7	you're dealing with.
8	Is that is that true?	8	And that is kind of the
9	Yes, it is.	9	simple statistics can tell you
10	T would armost DED to a	10	how how clean is this code
	I would expect DFP, to a		
11	little bit, be be a little	11	base.
	_	11 12	
12	little bit, be be a little		base.
12 13	little bit, be be a little bit bigger than AdX but, again,	12	base. And for me, it confirmed
12 13 14	little bit, be be a little bit bigger than AdX but, again, smaller than utilities. Is that	12 13	base. And for me, it confirmed that Google has continued with
12 13 14 15	little bit, be be a little bit bigger than AdX but, again, smaller than utilities. Is that true? Yes.	12 13 14	base. And for me, it confirmed that Google has continued with their practice of being diligent
12 13 14 15 16	little bit, be be a little bit bigger than AdX but, again, smaller than utilities. Is that true? Yes. So those kinds of things	12 13 14 15	base. And for me, it confirmed that Google has continued with their practice of being diligent and professional and strict
12 13 14 15 16	little bit, be be a little bit bigger than AdX but, again, smaller than utilities. Is that true? Yes. 1	That was the purpose of the	1	answer your question "no."
2	benchmark. It was incredibly valuable.	2	But I'm also not
3	Now, if you take that	3	referencing GAM on the standards
4	benchmark and you say, and this	4	of C++ language. It's just C++,
5	benchmark proves that the code for	5	you know, so
6	rightly is far better performed than the	6	BY MS. RHEE:
7	code for something else, I'm going to	7	Q. I know.
8	object to that. It wasn't written for	8	But I'm asking as a
9	that. That is not the purpose of that	9	methodological matter, insofar as you're
10	benchmark.	10	positing that this is a sound means
11	So in the discussion of	11	A. Mm-hmm.
12	lines of code, they can be both very	12	Q to do a health check,
13	useful and useless.	13	can you cite to anything that supports
14	Okay. If a manager uses	14	that proposition?
15	lines of code to promote people, like, I	15	MR. TESLICKO: Object to
16	get hives. That is such a stupid	16	form.
17	statistic to use in that context. So if	17	THE WITNESS: I am certain
18	you use lines of code in that context,	18	I can find those references for
19	yeah, they are they are terrible.	19	you and would be happy to
20	But if you use lines of	20	provide them for you.
21	code and say, these are reasonable lines	21	BY MS. RHEE:
22	of code written by engineers who were	22	Q. Okay. But you don't have
	Page 223		Page 225
			5 - 1
1	not trying to get promoted by just	1	it right now in any of your appendices?
1 2	not trying to get promoted by just writing more lines and and roughly	1 2	-
			it right now in any of your appendices?
2	writing more lines and and roughly	2	it right now in any of your appendices? A. No. I really didn't think
2 3	writing more lines and and roughly describe the size of the project, then	2 3	it right now in any of your appendices? A. No. I really didn't think we would be discussing such basic things
2 3 4	writing more lines and and roughly describe the size of the project, then that actually makes sense.	2 3 4	it right now in any of your appendices? A. No. I really didn't think we would be discussing such basic things that kind of a general agreement.
2 3 4 5	writing more lines and and roughly describe the size of the project, then that actually makes sense. Q. I'm asking	2 3 4 5	it right now in any of your appendices? A. No. I really didn't think we would be discussing such basic things that kind of a general agreement. As I said, I also don't
2 3 4 5 6	writing more lines and and roughly describe the size of the project, then that actually makes sense. Q. I'm asking A. Mm-hmm.	2 3 4 5	it right now in any of your appendices? A. No. I really didn't think we would be discussing such basic things that kind of a general agreement. As I said, I also don't cite anything on the history and
2 3 4 5 6 7	writing more lines and and roughly describe the size of the project, then that actually makes sense. Q. I'm asking A. Mm-hmm. 	Page 238		Page 240
1	pleasure of interacting with.	1	A. Very close.
2	From the ability to just	2	I would say that there are
3	list files, which files are in this	3	certainly functions inside BOW and
4	directory, ls, to the things like what	4	inside Supermixer. Supermixer is
5	is the name of the kernel that that	5	probably, again, most likely its own
6	you are running. You name ls-a.	6	product. But certainly inside BOW, that
7	All of those commands, they	7	the buyer would have to get the copy of.
8	are a part of operating system, but they	8	All of them, I cannot tell
9	are let's say they are not the core	9	you that, but certainly a fair number of
10	part. They are not the kernel, but they	10	it.
11	are called utilities.	11	Because as you will see,
12	And so I'm talking about	12	BOW being the what's called the
13	utilities of these things that you	13	utility-type part of the code base, is
14	really need in order to provide the	14	larger than the rest of the stuff.
15	service you're providing. But they are	15	And so there could be parts
16	not necessarily the part of your core.	16	in BOW that apply just to AdX. There
17	So in case of AdX, you will	17	could be parts that apply to just the
18	say it's an exchange. Its core part is	18	DFP. There could be parts in BOW that
19	the exchange.	19	support Supermixer itself. And there
20	But, you know, it may	20	could be some parts that are used by all
21	realize so, for example, you can	21	three.
22	utilize in BOW for a lot of things. BOW	22	But there could be other
	Page 239		Page 241
1	is those utilities that basically	1	parts they use by one or two or there
2	removes some responsibility from AdX to	2	are probably even parts that are not
3	allow AdX to be lean, mean, and operate	3	used by anybody and haven't been removed
4	cleanly. But AdX can call it and say,	4	from the code base for either historical
5	hey, give me this.	5	or or, actually, strategic reasons.
6	So a very, I would say,	6	So parts of it would have
7	advanced or the right way to develop	7	to certainly be provided to the
8	computer systems.	8	purchaser to make AdX work.
9	Q. Okay. But the upshot is, I	9	The other parts, Google
10	think, based on your earlier	10	could reasonably say, well, this is not
11	testimony	11	necessary to make AdX work, and,
12	A. Mm-hmm. Mm-hmm.	12	therefore, we are not going to be
13	Q is it's your opinion	13	providing it.
14	that BOW and Supermixer need to be	14	Q. Okay. So would you
15	divested, along with what you're calling	15	consider BOW and Supermixer to be a
16	core AdX	16	dependency of AdX and DFP?
17	A. Mm-hmm.	17	A. I would not use the term
18	Q in order to provide the	18	"dependency."
19	functionality that an acquirer would	19	I would say that AdX relies
20	expect.	20	on them, because they are really more
101	Is that have I got your	21	they are kind of on the same level, if
21	is that have I got your		that makes sense.

1	le Page Page Page Page Page Page Page Pag	,000	ntial August 27, 2025
1	Page 242		Page 244
_	And so they	1	dependency, and you refer to a
2	Q. It doesn't make sense.	2	dependency, and what you're describing
3	A. All right.	3	here for Supermixer and BOW, which you
4	Q. This is why I'm asking the	4	do not call a dependency
5	question, because I mean, let's just	5	A. Mm-hmm.
6	level set.	6	Q but instead call a
7	You are familiar with,	7	related utility system?
8	because you use it in your own report	8	A. So in my example, when I
9	A. Mm-hmm.	9	was describing UNIX, I wouldn't say that
10	Q and certainly	10	UNIX kernel depends on utilities. It's
11	Dr. Weissman uses it in his, and you	11	just they they are there is
12	rely upon	12	kernel, there is utilities, but they are
13	A. Mm-hmm.	13	one, right?
14	Q this notion of a	14	And even though you could
15	dependency, right?	15	separate them by code base, you compile
16	A. Absolutely. Yes.	16	them differently and separately and so
17	Q. Okay. And how long a	17	on, they from the computer science
18	divestiture takes or your step of	18	standpoint and from the practitioner
19	technical decoupling	19	standpoint, you would never I don't
20	A. Mm-hmm.	20	think any engineer would say, oh, when I
21	Q depends on both the	21	say UNIX, I mean UNIX kernel, and I
22	number of dependencies and the	22	think UNIX Utilities, right, is
	Page 243		Page 245
1	complexity of those dependencies, right?	1	dependencies.
2	MR. TESLICKO: Object to	2	We just say UNIX. It's the
3	form.	3	product. It's the kernel. It contains
4	THE WITNESS: Not exactly.	4	all of the utilities. We use it as one.
5	That's a very because, again,	5	Q. Yeah. But when we're
6	the parallelization comes to the	6	talking about UNIX here, we're talking
7	issue.	7	about internal Google infrastructure and
8	In the strictest technical	8	its product
9	term, you could really say that	9	A. Product.
10	all four of these most likely	10	Q source code.
11	depend on each other and call	11	A. Mm-hmm.
12	each other.	12	Q. So here I just want to be
13	Now, do they call	13	clear
14	everything inside BOW? No	14	A. Mm-hmm.
15	BY MS. RHEE:	15	Q about what your
120	Q. No. Understood	16	testimony is.
16	A. But some aspects of it, for	17	Your view is that BOW and
17		18	Supermixer, vis-à-vis AdX and DFP, are
	sure.		
17	Q. Right. But that's the	19	not dependencies.
17 18		19 20	not dependencies. MR. TESLICKO: Object to
17 18 19	Q. Right. But that's the		-

	Page 262		Page 264
1	in the columns for BOW and Supermixer	1	have information that shows
2	A. Mm-hmm.	2	otherwise, but this is my
3	Q are bigger than the	3	working premise.
4	numbers in the columns for AdX and GFP.	4	His analysis may have been
5	MR. TESLICKO: Object to	5	incomplete, but it's going to be
6	form.	6	incomplete in that case.
7	BY MS. RHEE:	7	And and I do want to
8	Q. Fair?	8	say, this is your stipulation.
9	A. No. I told you that what	9	The parameters that I disagree
10	I'm looking for those are some of the	10	with, it's going to be
11	numbers that I'm looking for.	11	incomplete in exactly the same
12	I'm looking to identify	12	way in all four of these
13	utilities, and I know that the utilities	13	BY MS. RHEE:
14	will be bigger than the other files and	14	Q. Well, you don't know that,
15	so on.	15	sitting here, right, because you don't
16	Q. Well, you're looking to see	16	know because you don't know what's
17	if they are going to be bigger	17	contained underneath each of these
18	A. Yes.	18	top-line directories, or, I guess, they
19	Q than the files, as you	19	are referred to as top-level folders,
20	put it, for AdX and DFP.	20	how many folders are associated with BOW
21	A. That is correct. Yes.	21	and Supermixer that are not part of
22	Q. Okay. So if it turns out	22	these particular folder paths that
	2. 5.1.1, 15 55 55 51 51		
	Page 263		Page 265
1	that, because what Dr. Weissman did in	1	Dr. Weissman describes, right?
2	order to get to the counts for the	2	MR. TESLICKO: Object to
3	columns associated with AdX and DFP are	3	form.
4	incomplete, and you don't actually know	4	THE WITNESS: So the issue
5	what those numbers are, how can you do	5	here is the process, right.
6	the comparison of what those actual	6	He is doing the process,
7	numbers are, to the numbers for the	7	trying to identify these files.
8	related utilities?	8	Let's assume that that
9	MR. TESLICKO: Object to	9	process and, again, I
10	form.	10	disagree with this hypothetical
11	THE WITNESS: So Professor	11	strongly.
12	Weissman used a process and a	12	And I am not trying to at
13	methodology to obtain these	13	all suggest that Professor
14	numbers.	14	Weissman would make this
15	My starting assumption is	15	mistake, because I don't if
16	that Professor Weissman did not	16	you look at his credentials and
17	intentionally try to deceive the	17	so on, as far as I'm concerned,
18	court and has relied on his	18	he is the expert in this area.
1		19	But, even, let's say,
19	expertise, so he has used		
19 20	expertise, so he has used exactly the same process in all	20	entertaining your hypothetical,
	_	20 21	entertaining your hypothetical, he's using a process, and that

involved in that whole product. 14 Okay. And so that's the 15 16 experience that you relied upon in 17 making your original estimates? 18 MR. TESLICKO: Object to 19 form. 20 THE WITNESS: That is the 21 experience I called on. One of 22 the things that I've done in the that AdX and DFP will be migrated first to the Google public cloud?

A. I am proposing what I would call one reasonable option, but I'm not saying that other people could not come up with other reasonable options that, you know, go to different destination and so on.

Just one reasonable option, and in my option, I propose going to Google public cloud, yes.

- Q. Okay. And that option that you put forth --
 - A. Mm-hmm.
 - Q. -- which is that AdX and
 DFP first get migrated to the Google
 public cloud, that impacts your
 estimated timelines that you put forth
 for all of the downstream steps, right?

 MR. TESLICKO: Object to
 form.

THE WITNESS: Yes and a

                  Okay. New topic.
            Q.
```

Your migration plan assumes

- no.

 The reason why I suggest you should go -- you should consider going to Google public cloud is because I have guarantee that I will have expertise available on Google public cloud and, obviously, on Google public -- private cloud available to me at the time of divestiture.

 If, for example, let's say Amazon were to decide and be a buyer -- and this is me just
- Amazon were to decide and be a buyer -- and this is me just picking a person out of thin air. I have no idea if they are in any way, shape, or form, one -- but they are the owners of their own cloud, right. So they are the owners of AWS and S3.

 And so if a potential

1		And	1	MR. TESLICKO: Object to	
2	BY MS. RHEE:		2	form.	
3	Q.	You mean a software	3	THE WITNESS: No. What	
4	engineer?		4	what you're doing in that stage	
5	A.	Software engineer from the	5	is so you have found the	
6	product team	ı, yes.	6	systems that you are relying on	
7		And you should be able to	7	and you need to replace.	
8	get this don	e in a couple of days.	8	Not only are you picking a	L
9	Q.	Okay. I just want to	9	system that you will be	
10	A.	Mm-hmm.	10	eventually replacing it with,	
11	Q.	Thank you for the	11	but you actually are doing the	
12	clarificatio	on.	12	cuts.	
13	A.	No problem.	13	You are in the first	
14	Q.	I am not an engineer, so I	14	stage and how I would suggest	:
15	now want to	just clarify.	15	that they do this is	
16		Your testimony today is	16	basically write a simple	
17	that you bel	ieve you really just need	17	passthrough calls, and so you	
18	one performance engineer, one site		18	you kind of add a layer. You	
19	reliability	engineer, and one software	19	can call it a mock, if you like.	
20	engineer fro	m the product team working	20	And in the first stage	
21	over a couple of days?		21	that thing does nothing but	
22	A.	Yeah. To get this done.	22	passes through the call that	
		Page 387			Page 389
1	Q.	Okay. And this is the	1	will then go to whatever is	
2	first stage	of your migration plan that	2	still currently the system	

first stage of your migration plan that you labeled "Deployment Analysis"? 3

> "Deployment Analysis," yes. A.

Ο. Okay. All right.

6 And the second stage of

7 your --

4

5

11

17

8 A. Mm-hmm.

9 -- four-stage migration 10 plan you call "Technical Decoupling,"

correct?

12 A. Correct.

Okay. And that's the stage 13 of your migration plan that you believe 14 15 will take the most amount of time,

correct? 16

> A. That is correct, yes.

18 Okay. And that stage is 19 evaluating the replacements for all of

20 the dependencies for AdX and DFP and 21 then choosing the best replacement

22 options?

still currently the system 3 supporting AdX in a Google private cloud.

Once you have identified 6 all of those, let's say, for 7 database, because that is the one that I believe should start 8 9 first, the -- the first thing 10 that I would do is verify did we 11 really identify all of those

12 correctly.

And now because all of the 13 calls are going through the 14 15 mock, that is relatively easy to 16

I sort of disable the 17 mock, and if the database is 18

19 still getting calls from me,

20 that means that there are places that I've missed them, and I 21

have to go and find them as well

1 But this is also a place 2 that, if you have a buyer 3 already identified, you can get 4 their input on what is the 5 replacement system they would 6 like. 7 And, fundamentally, you 8 just have to rewrite those APIs.

9 BY MS. RHEE: 10 Q. Okay. And sitting here

12 A. Or API calls.

today --

11

13

14 15

16 17

18 19

22

Q. Sitting here today, what is your opinion about how long this step or stage in the -- your four-step migration plan, it would take?

A. So I have given that stage eight months, and I -- when I make these kinds of determinations, in general -- I've been called a pessimist, so just so

20 I've been called a pessimist, so just so 21 you know.

But the way I look at

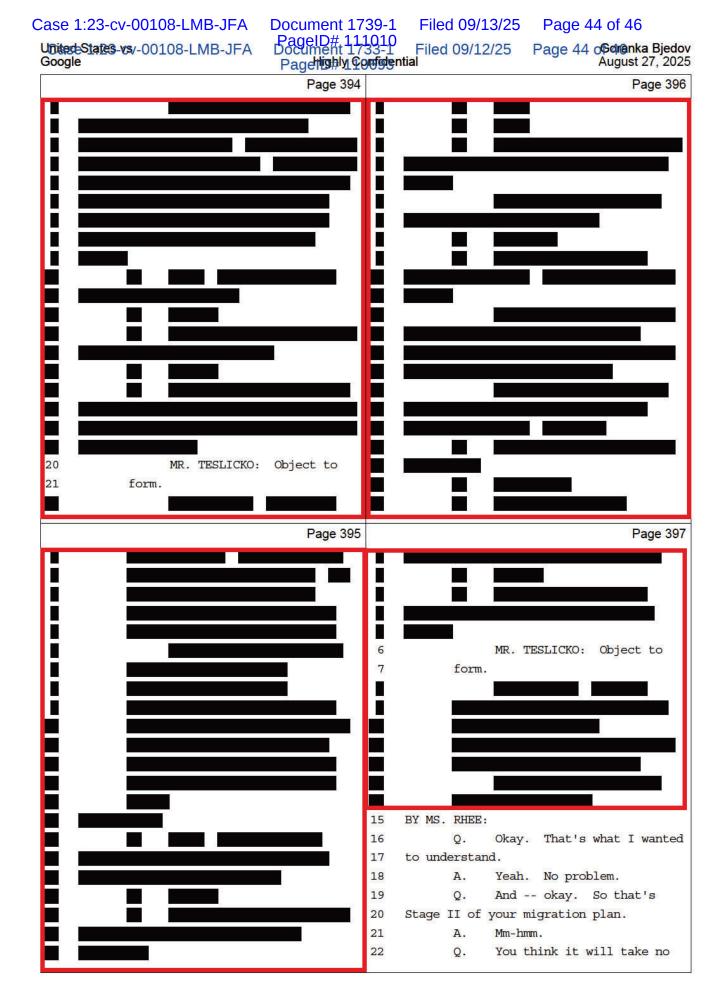

say, given the size that I have been

say, given the size that I have been told about the system, how much time

3 would it take to migrate a database of

4 that size into the new environment.
